MEMORANDUM

TO: Distribution

FROM: Kay Thomas Packett KTP

Enclosed for your review are the two documents we discussed at the last meeting of the OSHA consultants: a revised "Statement of Principles" and an accompanying brief outlining additional issues that the industry should consider but that are not yet addressed in the statement of principles.

I would appreciate receiving any additional comments by Monday, March 2, if at all possible. Please let me know in the meantime if you have questions or suggestions.
